■ **Portfolio Management Services**

Our Portfolio Management Services supports the analysis and price difference across various exchanges, providing visibility and the transparency to determine changes and shifts in the market. Our software will adjust the buy and sell price dynamically for our clients.

■ **Wallet Software Management & Protection**

Our Wallet Software & Services are based on NSA designed SHA-256 cryptographic hashing algorithm for managing and protecting digital currency. We use Multi Signature, Cold Wallet Storage and Paper Wallet Options and offer Debit Cards that interface with legacy POS systems.

■ **Digitizing Rewards Program**

As part of a customized solution, we offer a Digitized Token Solution leveraging blockchain technology. Clients can may create their own Digitized Tokens to be used for Rewards Programs, Loyalty Programs, Discount Offerings or Additional Purchases.
